"AVAILS"

MEDIA MANIFEST

Standard inputs (avails and manifest) linked with a standard identifier unlocks...

Reduce avail cycle time, Reduce defect rate, Improve transactional reporting, Reduce ingestion cycle time, Reduce ingestion costs, Reduce contact rate, Improve SLAs, ... *20x Improvement* Optimize user experience... *30x*

New Development This Week

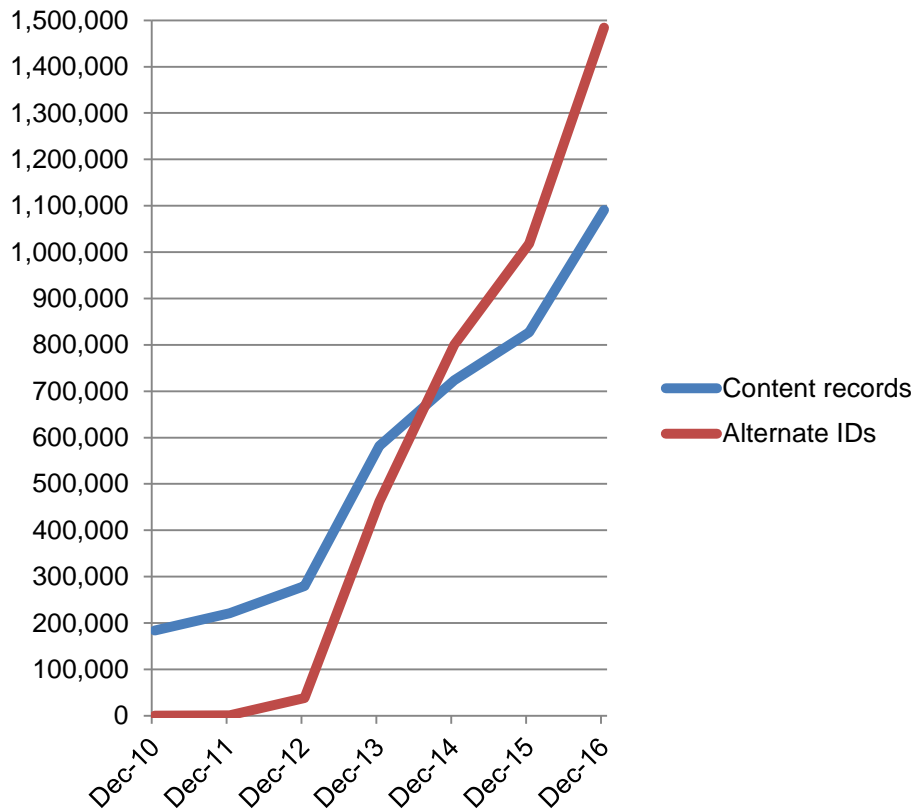

Round Trip Workflow for Financial Reporting

- Google has announced that YouTube Transactional reports have been improved to include the EIDR ID when that number is provided in an Avail.
- This marks the completion of the EIDR “round trip,” where the EIDR ID is used in the initial publishing of the Avail for a piece of content all the way through to financial reporting on the performance of the content.
- Transactional reports will include both the EIDR Title ID and the EIDR Edit ID if provided to that level of granularity by the content supplier.
